LANGUAGES

English – Advanced (C1)

French – Elementary (A1)

Hindi – Upper Intermediate (B2)

CORE TOOLS

- Python (GeoPandas, GDAL, Rasterio)
- Google Earth Engine
- QGIS / ERDAS / ENVI
- PostgreSQL / PostGIS
- R / Statistical Analysis
- JavaScript / HTML5 / CSS

KEY AWARDS

- FNRS Doctoral Fellowship (2022)
- NASA Space Apps: International Winner (2020)
- Smart City Hackathon Winner (2021)
- ESRI Young Scholar Finalist
- IIT Bombay Mapathon Champion (2021)
- AICTE Grant: ₹1.67M (2019–2022)

CERTIFICATIONS

- QGIS Professional (ISTAR)
- Differential GPS (DGPS)
- AutoCAD
- 3D Laser Scanning
- UAV / Drone Operations

Pranav Pandya

FNRS PhD Fellow | NASA Space Apps Int'l Winner 2020 | Best Paper Award | M.Tech Dept. Topper – SIG (2019–21) | Varanasi Hackathon Winner

ABOUT ME

Spatial data and urban analytics specialist with strong expertise in GIS, remote sensing, geospatial modeling, and smart city applications. Currently in the last year of a PhD in Architecture and Urban Planning at UCLouvain, focusing on green infrastructure, thermal comfort, and human-centered mobility analysis. Experienced in satellite image processing, IoT sensor integration, urban climate analysis, renewable energy planning, and spatial decision support systems. Proven ability to translate research into applied solutions for sustainability, infrastructure planning, and environmental monitoring.

PROFESSIONAL EXPERIENCE

Doctoral Researcher — Urban GIS & Environmental Analytics

UCLouvain, Belgium | 2022 – Present

- Environment and psychophysiological sensors were used for evaluating green infrastructure impact on urban thermal comfort by analyzing pedestrian and cyclist exposure to microclimate stresses.
- Produced high-resolution datasets in field experiments and developed urban biking dashboard for urban planning applications, and integrated environmental, mobility, and behavioral datasets into decision-support workflows

Junior Research Fellow — Smart City Energy Analytics

FLAME University, India | Apr 2021 – Mar 2022

- Worked on government DST-funded smart city project focusing on building energy modeling. Processed high-frequency IoT sensor measuring temperature & humidity which linked land cover, microclimate variability with building energy

Research Intern — Remote Sensing & Renewable Energy

Space Applications Centre (ISRO), India | Jan 2021 – Apr 2021

- Processed satellite imagery and terrain data for electronic vehicle charging infrastructure site optimization.

EDUCATION

PhD in Architecture & Urban Planning (ongoing)

Awarded FNRS Doctoral Fellowship | UCLouvain, Belgium | 2022 – Present

- Green infrastructure, thermal comfort, and human-centered mobility analysis

M. Tech in Geoinformatics & Surveying Technology

Symbiosis International University (SIU), India | 2019 – 2021

- Department topper and Symbiosis Merit Scholarship winner (all semesters)
- Thesis: Optimal Solar Power Plant Locations for EV Charging (SAC-ISRO)

B.Tech in Civil Engineering

Birla Vishwakarma Mahavidyalaya (BVM), India | 2015 – 2019

Awarded AICTE fund ₹1.67M | Thesis: Smart Crime Management in Smart Cities
